## On-Site Crane Safety Personnel

CICB provides full or part time crane subject matter experts on job sites before and during projects to improve safety performance. CICB's experienced staff can support your existing safety staff, or fill in vacancies on short or long term contracts to provide:

- Lifting and Material Handling Site Hazard Assessment
- Compliance with OSHA / ASME standards including 1926 Crane and Derricks in Construction Subpart CC
- Classroom and Hands-On Skill Training
- Pre-lift and General Safety Meetings
- Lifting and Rigging Supervision and Management
- Contractor and Vendor Evaluations
- Certifications for In-House Employees and Contractors
- Inspections of Cranes and Rigging Gear

### Types of Projects:

- New Construction
- Turnarounds
- Outages / Shutdowns
- Ports / Ship Construction
- Demolitions

### Available Durations:

- Weekly
- Monthly
- Annually
- Project Based

## CICB Management Services

Headquartered in Orlando, FL since 1969 with a second training facility in Houston, TX, Crane Inspection & Certification Bureau (CICB) performs crane and material handling safety services worldwide. Our management services are designed to help organizations:

- Achieve Regulatory Compliance
- Reduce Accidents and Injuries
- Increase Worker Skills and Productivity
- Reduce Equipment Maintenance Costs
- Increase Equipment and Operations Reliability
- Extend Equipment Operating Life
- Help Complete Projects On Time and Under Budget

## Policy and Procedure Writing

CICB provides personnel experienced with policy and procedure writing to create and/or update existing policies and procedures to reflect latest OSHA and other Governmental Regulations, ANSI/ASME and API Standards, written and unwritten company policies, and generally accepted industry best practices. Policies and Procedures can include, but are not limited to:

- OSHA 1926 Cranes and Derricks in Construction Standard, Subpart CC
- Training
- Inspections
- Pre-Use Inspections
- Lift Plans
- Safety Meetings

## Manager and Supervisor Training

The CICB Manager and Supervisor training programs have been developed to provide the knowledge and tools needed for safe operations in these four important areas:

- Overhead Crane/Hoist Operations Safety
- Rigging Operations Safety
- Mobile Crane Operations Safety
- OSHA 1926 Cranes & Derricks in Construction, Subpart CC

These programs can be customized for your particular site, equipment and industry regulations. Specialized training programs from CICB are a great tool to use in preparing for major construction projects, turnarounds and annual corporate safety meetings.

## Regulatory Compliance Audits

CICB provides personnel experienced with regulatory compliance requirements in the maritime, general and construction industries to perform audits of existing policies and practices. When complete, you

will receive our recommended changes to improve safety, employee work habits, equipment reliability, and compliance with Federal, State, Military, Industry, Manufacturer and Company guidelines.

## Expert Witness Testimony

CICB offers expert witnesses specializing in material handling equipment failure, OSHA/ASME standards or operator qualifications. CICB's extensive experience in the field and in the training room help explain these complex matters simply, in and out of the courtroom.

Additional support services from CICB include:

- Assessment of Specific Crane Operator, Rigger and Signal Person Skills
- Worksite Safety Hazards Analysis
- Safety and Lift Plan Reviews
- Technical Support for Litigation

Services provided to:

- Owners
- Contractors
- Municipalities
- Insurance Companies
- Attorneys

## Accident Investigation

CICB provides unbiased, third party post-accident investigation services. CICB investigators have an organized and systematic approach to investigations that allows the true "Root Cause" to be determined. Job Tasks and Responsibilities, Training Records, Policies and Procedures, Inspection and Maintenance Reports, and Manufacturers' Recommendations are among the many aspects reviewed. Data collection also includes:

- Accident Site Visits
- Photography
- Interviews of the Parties Involved
- Laboratory Analysis of Failed Components
